Implement A Successful Art Therapy Program With Youth Affected By Traumatic Events & Health Challenges

Youth often find non-verbal expression the only outlet to their intense feelings of fear, isolation, sadness, anger, and loss. An art therapy program helps kids build resilience and move beyond life’s hurdles, promotes self-awareness, improves self-esteem and competence, develops coping and control skills, and leads to a stronger future. Explore the many beneficial outcomes of an effective art therapy program.

Engaging Children & Young Adults In Creative Discovery & Healing

“One important aspect of art therapy is the creation of a safe space where traumatic feelings can be processed. Sometimes the verbal skill is lacking to describe traumatic experiences and by creating art, the person can feel more confident.”

Articles & Videos
Throughout life, our bodies, minds, activities, families, friends, and living environments change. Disturbing events can be doubly unsettling to youth. Art therapy can help in any setting, through any stage, by providing a safe, supportive, creative and positive experience to help ease transition, depression, and fear. Integrating a healing, trauma-informed approach to care greatly reduces the harmful health impact of violence and trauma on the young.

### COMMUNITY
**Wraparound Orange / Orange County, FL**
The program formed a partnership with the local Neighborhood Center for Families site to emphasize children’s mental health and target families within the community’s high-crime zip codes. Currently working with youth aged 12 and under, and their families.

### EARLY CHILDHOOD
**Project ABC / Los Angeles, CA**
The program is designed to create a system of care for young children who are in need of mental health services in the Los Angeles area. The goal is to ensure that children birth to five years have access to mental health services that are family-centered, strength-based, and culturally competent.

### JUVENILE JUSTICE
**Impact / Lansing, MI**
The program is a partnership of child and family-service agencies working with youth and families that strives to build and enhance home- and community-based services for young people involved with the juvenile justice system and/or Department of Human Services.

### MEDICAL
**Children's National Medical Center / Washington, DC**
The New Horizons program helps children transcend the hospital experience. Activities encourage continued learning, promote wellness through self-expression, and speed healing.

### MENTAL HEALTH
**WIN Georgia / Ft. Oglethorpe, GA**
A regional effort serving children between the ages of birth and 21 with a diagnosed mental illness. The program helps families handle a child’s behavior and offers help finding and coordinating necessary services.

### MILITARY FAMILIES
**Operation Oak Tree / Chicago, IL**
The program assists military children and families throughout the cycle of deployment. Its mission is to foster personal growth, deepen interpersonal roots, strengthen coping strategies, and to make it easier for families to branch out into their communities for support.

### REHABILITATION
**Inspirations For Youth & Families / Ft. Lauderdale, FL**
The purpose of the program is to help teens express concepts that they may not be able to articulate. The drawing, painting, collage, or sculpture can then help bridge artistic expression into verbal expression. And from there, healing begins.

### RESIDENTIAL
**Daytop New Jersey / Mendham, NJ**
The program offers a variety of treatment programs; all of which are committed to working with those adolescents who have a diagnosis of a co-occurring mental health disorder in addition to their substance abuse disorder.

### SPECIAL EVENT
**Community Initiatives Foundation / Baton Rouge, LA**
The collected art and the videotaped interviews of children and youth who experienced the trauma of Hurricane Katrina are a powerful testimony of their needs as well as the positive impact of a trained response.

Implementation Tools

There are a number of accessible options for implementing an appropriate, thriving art therapy program. Credentialed art therapists are experienced professionals that work with children and youth to help advance their confidence, resilience, self-esteem, and bring promise to the future.

This user-friendly electronic toolkit was developed to assist the many diverse groups serving the youth population throughout the nation in initiating or expanding an art therapy program. Credentialed art therapists hold either a master’s or doctoral degree in art therapy, and are best qualified to implement a beneficial, therapeutic, effective program.

“Among even very young children, ages 18 to 36 months, exposure to potentially traumatic events is associated with a range of socio-emotional and behavioral problems that may compromise healthy development and place them at risk for persistent serious psychological problems later in childhood and in adulthood. More than 35 percent of children exposed to a single traumatic event will develop a serious mental health problem.” -Turning Point
